The wrath of AI on corrupt people

Published: 27 Oct 2026

Gwalior | Corruption continued right under the government's nose and was ignored, but now new technology has gradually started exposing corruption. An officer from the state's Urban Bodies and Housing Department has revealed irregularities in procurement with the help of AI. When purchase irregularities were caught using AI, it caused a stir across the state. So far, 392 officers, including 135 CMO officials, have come under action because of AI. The interesting thing is that 374 urban bodies made purchases worth 11.34 billion through the GEM portal. Out of this, about 2.5 billion corruption-related cases have come to light. This amount was overpaid in the purchases.
